

Navigator 600 series Silica and phosphate analyzers

New pump enhancements

Dear customer

In line with our drive for continuous product improvement, the Navigator 600 Analyzer has now been fitted with a new improved pump design.

Functionally the same, the new pump will deliver enhanced reliability and improved pump performance. Full details of the pump changes are contained in the user guide supplied with the analyzer or downloaded from:

<http://search.abb.com/library/Download.aspx?DocumentID=IM/NAV6S&LanguageCode=en&DocumentPartId=&Action=Launch>

It is important to note that the Annual Maintenance Kit part numbers AW601115 (Silica) and AW602115 (Phosphate) cannot be used with the new pump.

New Annual Maintenance Kit part numbers have been issued:

- Silica AW601155
- Phosphate AW602155

These new kits are suitable only for analyzers fitted with the new pump and must not be used with the old pump version. For any questions relating to these enhancements please contact:
