

SACE Isomax S.

The greatest project for moulded-case circuit-breakers.

An audacious work of human ingenuity, famous throughout the world for its innovation, rationality and functionality which is always to the fore and unique of its kind. SACE Isomax S is a series of circuit-breakers conceived to fulfil the most advanced installation requirements.

The basic range, divided into 8 sizes, is today completed with the ranges of automatic current-limiting circuit-breakers, circuit-breakers in direct current, circuit-breakers for motor protection and switch-disconnectors, for a variety of applications, which nobody else is able to offer.

SACE Isomax S circuit-breakers have in common their simplicity and rapidity of installation, compliance with international standards, and their capacity to dialogue with supervision and control systems, such as the innovative SACE SD-View 810 self-configuring software.

I_n=125A-3200A, U_e=690V, I_{cu}=16kA-200kA a 380/415V
