New common engineering tool PS501 Control Builder Plus V2.1

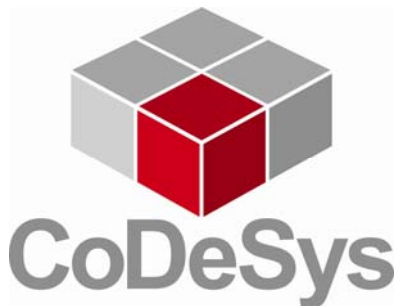

What's new?

- Single tool to configure, program, design, diagnose, commission, setting up internet
- Internet technology included: HTTP – FTP – SMTP – SNTP – DHCP – BOOTP – DNS – PING
- Diagnostics down to the port - diagnostics setup is automatically
- Multiple watch lists for fast commissioning
- Includes ABB Drives Manager - single access to PLC and to drive for straightforward engineering
- Fully compatible with AC500-XC for eXtreme Conditions
- Easy access to other ABB engineering tools like PlutoManager and PanelBuilder 600
- Based on de-facto standard CoDeSys
- C code with optional compiler: for complex algorithms and faster program execution
- Runs under Windows 7 32/64 bit
- USB ROM-drive for faster installation, suitable for modern notebooks

Order code: 1SAP 190 100 R0200

Automation Products For PLCs AC500, AC500-eCo, HMI, ABB drives

Single access to PLC and to drive
