

Line Differential Protection and Control Relion® 615 series

RED615 is a phase-segregated, two-end, line differential protection and control IED designed for utility and industrial power systems, including looped and meshed distribution networks with or without decentralized power generation.

The genuine implementation of the IEC 61850 substation communication standard covers vertical and horizontal communication. RED615 is a member of ABB's Relion® protection and control product family.
