

Self-Powered Feeder Protection REJ603

REJ603 is intended to be used for the selective short-circuit and earth-fault protection of feeders in secondary distribution networks and for protection of transformers in utilities and industries. The relay is a self-powered numerical

relay, which requires no external supply voltage, making it an ideal choice for installation in remote locations where auxiliary supplies are not available. REJ603 is a member of ABB's Relion® protection and control product family.
