

Motor Protection Relion® 610 series

The functionality of REM610 is primarily focused on the protection of large asynchronous low-voltage motors and small and medium-sized asynchronous high-voltage motors. The plug-in design of the 610 series IEDs facilitates the

commissioning of the switchgear and enables fast and safe insertion and withdrawal of IED plug-in units. REM610 is a member of ABB's Relion® protection and control product family.
