## Lifecycle phase change of ACS600 MultiDrive W frequency converters

### 1. LIFECYCLE PHASE CHANGE

This document announces the transition of ACS 600 MultiDrive W frequency converters, hereafter the product, to the classic phase of ABB's product lifecycle on May 1, 2007.

### 2. SUPPORT AVAILABILITY

During the classic phase the product will be fully supported and maintained by ABB regardless of which manufacturing unit delivered the product.

During this phase ABB will also offer a full set of services for the product, including, but not limited to:

- spare parts and repair services (new and refurbished parts and electronics repair)
- training services
- technical support and on-site support services
- preventive maintenance services to minimize effects of aging of components and to maximize reliability
- upgrade services to increase output and to extend the lifecycle

Re-manufacturing and overhaul capabilities will also exist, providing opportunities to purchase complete modules for spare part purposes.

### 3. LIFECYCLE PLAN

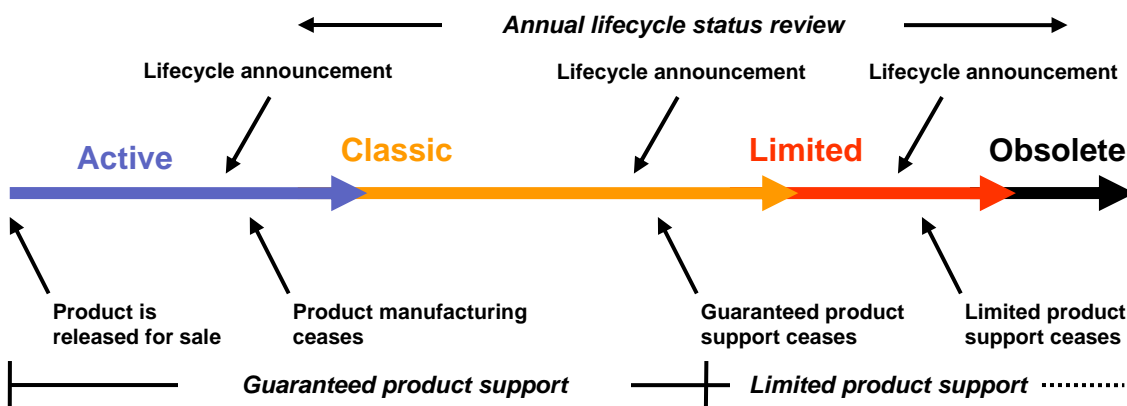

The product is planned to remain in the classic phase at least until 2013 and move after this to the limited phase for some more years.

The lifecycle management approach allows us to manage an orderly transition process while we ensure that our valued customers have access to continued support.

### 4. FURTHER INFORMATION

For further information please contact ABB by e-mail: [global.productsupport@fi.abb.com](mailto:global.productsupport@fi.abb.com).

### 5. ABB LIFECYCLE MODEL

Specifications subject to change without notice.
