The air cooled ACS600 MultiDrive AC drive

1. CURRENT LIFECYCLE STATUS

The air cooled ACS600 MultiDrive AC drive is in the classic phase of the ABB Drives product lifecycle plan. It is planned to remain in this phase until 2013.

2. SUPPORT AVAILABILITY

In the classic phase the product will be fully supported and maintained by ABB regardless of which manufacturing unit delivered the product.

In this phase ABB will also offer a full set of services for the product, including, but not limited to:

- spare parts and repair services (new and refurbished parts and electronics repair)
- training services
- technical support and on-site support services
- preventive maintenance services to minimize effects of aging of components and to maximize reliability
- upgrade services to increase output and to extend the lifecycle

Re-manufacturing and overhaul capabilities will also exist, providing opportunities to purchase complete modules for expansion projects or for spare part purposes.

Note: ABB global LV Drives Product Support provides all the above mentioned services. Services between different countries may vary.

3. LIFECYCLE PLAN

The product is planned to be kept in the classic phase at least until the end of 2013 after which it will be transferred to the limited phase. The length of the classic and limited phases together is at least twelve years for the product.

The ABB lifecycle management approach allows us to manage an orderly transition to a new product while we ensure that our valued customers have access to our continuing support.
