TYRAK LCI Converters

1. SUPPORT AVAILABILITY

The TYRAK LCI drive product type YRTK is in the limited lifecycle phase according to the ABB definition. Support of the product follows the principles outlined below.

2. PRODUCT HISTORY

The TYRAK LCI series of AC converter was manufactured by ABB Drives Sweden during 1991-1994 and by FIDRI 1995-1998. TYRAK LCI has been delivered worldwide. Production of TYRAK LCI ceased in 1998 when the product was phased out.

3. CURRENT LIFECYCLE STATUS

The TYRAK LCI series is presently in the limited phase of its life cycle until end of 2012. During the limited phase the product will be supported and maintained by ABB regardless of which organization delivered the product.

The limited services are available as follows:

- Spare part service continues as long as the components are available
- Off-site repair services (refurbished parts and electronics repairs)
- Off-site technical support, on-site services and training **are very limited and depending on availability of trained staff**
- Recommended replacement with an active product. For any details please use contact data mentioned in section 6.

4. LIFECYCLE PLAN

TYRAK LCI series will move into the obsolete lifecycle phase in beginning of 2013. During the limited phase the product will on request be supported and maintained. ABB will support the TYRAK LCI series until 2012, and possibly even beyond, depending upon availability of critical components and other services.

FURTHER INFORMATION

For more information on the available TYRAK LCI services, such as preventive maintenance, and on the ABB lifecycle policy for drives, please contact your local ABB.

5. RECOMMENDED ACTIONS

Replacement solutions for TYRAK LCI drives are available.

6. CONTACTS
