

Dear student,

Welcome to study our Motors and Generators e-learning courses!

Enter your user name and password in TP Online. Apply for the course you are interested in. If your application is made correctly, you are able to start your studies immediately. If you cannot see the course units, the pop-up blocker is probably on. To turn off the pop-up blocker in the web browser, please go to Tools -> Pop-up blocker -> Turn off pop-up blocker. If this doesn't help, please let us know.

Start your studies by entering the first unit "Start here menu". Choose Notes to see the course material and set the volume to hear the recordings. To exit from the unit, click Exit in the upper, right corner and Exit Now. If you want to take a break in your studies, you can continue afterwards from where you left off by choosing Review and Yes to resume your presentation.

The Student binder for this course can be found from the Start here menu in the Attachments. For most of the courses there is a final exam in connection to the course. To pass the exam and the whole course, there is a minimum of correct answers set for each course.

We advise you to reserve time and a quiet place, if possible, in order to be able to study without interruptions. Once you start studying and open a unit, the status of the unit changes from Not Attempted to Incomplete. The status changes from Incomplete into Complete when you have studied all the material.

When needed, our Training team will assist you in this training, please send an e-mail to motorsandgenerators.training@fi.abb.com. Factory representatives will help us to instruct in the course and answer to your questions.

Please contact us asap if you have any difficulties in attending this course or studying it through.

Best regards and have fun in learning!

BU Motors and Generators training team
