

The Robot Training Centre, Milton Keynes

Newsletter December 2008

Recession? Recession? we call it an opportunity...

Take this opportunity and get your personnel up to speed with your ABB technology.

We all know what the media is saying ... yes times are hard but we must look to the future as manufacturing in the UK will survive and we must be ready for the upturn. In the current economic climate investing in training will initiate savings by ensuring maximum productivity from both your equipment and staff, therefore stimulating the growth and prosperity of your company.

Getting the most from your technology is paramount to being competitive. People who attend our training courses gain confidence with the technology, along with the ability to see ways of improving their own company's way of working, thus making your production leaner and enabling them to be more innovative.

Investing in training at such times is not always an obvious choice, but having a workforce that is more knowledgeable in their work environment will give you the edge over your competitors, enabling you to be ready for the bright future ahead.

Click on the link below for the Training Schedule showing dates and prices, then call Sue Bond to book your investment.

New Upgrade to the RobotStudio 5™ Software

In October Simon and Richard, our ABB Trainers, spent a week at the ABB Training Centre in Gothenburg on the 'Train the Trainer' course for the new upgrade to RobotStudio 5.11, which is very different from RobotStudio 5.10.

Please click on the link below where Simon updates you with more information on the new upgrade

Robots in Training go Wireless

ABB have now added Remote Service to the IRC5 and S4C Plus robots and this will be available to view whilst you are in Milton Keynes. To find out about how "our robots can speak" please click on the attached link.
