

The Robot Training Centre, Milton Keynes

Newsletter Summer 2009

Bespoke training & savings to suit your needs & budgets...

One day Robot Q&A courses

Do your robot operatives have questions where the answers are perhaps eluding them? Maybe it's just a recap on safety and jogging instructions or more complicated questions that would increase your production when answered.....but does it warrant a full scheduled course to gain the knowledge to these specific problems faced on a day to day basis? We are finding more and more customers are opting for the one day dedicated Q & A course, which can either be held on site for a maximum of four, or at the Training Centre in Milton Keynes for up to a maximum of ten students.

These one day courses complement our already existing range of one day courses including :-

- S4C Cold Booting
- RobotStudio Online
- External axis / Orbit Manipulator

Summer Offer - Buy one, get one half price

Training to gain the full scope of your robot investment is even more critical in the present economic climate to stay competitive. We know budgets are tight, and with this in mind ABB would like to help their customers by offering a buy one get one half price on all scheduled courses, booked and taken before the end of September 2009. This makes it the best time to get the most from your training budgets and, more importantly, from your operatives.

For information on our scheduled courses please click on the link to our website below and open the Training Schedule for dates and prices.

Please note ABB are also more than happy to tailor-make courses to suit your own requirements held either at Milton Keynes or on-site.

The invitation to visit our Training Centre at Milton Keynes is always open to visit and meet the instructors, just give us a call and we will be pleased to show you around our superb facilities.
