

High Voltage Surge Arresters Buyer's Guide — Section EXLIM R

Zinc Oxide Surge Arrester EXLIM R

Protection of switchgear, transformers and other equipment in high voltage systems against atmospheric and switching overvoltages. For use when requirements of lightning intensity, energy capability and pollution are moderate.

Other data can be ordered on request. Please contact your local sales representative.

Brief performance data

System voltages (U_m)	52 - 170 kV
Rated voltages (U_r)	42 - 168 kV
Nominal discharge current (IEC)	10 kA _{peak}
Classifying current (ANSI/IEEE)	10 kA _{peak}
Discharge current withstand strength:	
High current 4/10 μ s	100 kA _{peak}
Low current 2000 μ s	600 A _{peak}
Energy capability:	
Line discharge class (IEC)	Class 2
[2 impulses, (IEC Cl. 8.5.5)]	5.0 kJ/kV (U_r)
Fulfils/exceeds requirements of ANSI transmission-line discharge test for 170 kV systems.	
Short-circuit/Pressure relief capability	50 kA _{sym}
External insulation	Fulfils/exceeds standards
Mechanical strength:	
Specified long-term load (SLL)	3000 Nm
Specified short-term load (SSL)	7500 Nm
Service conditions:	
Ambient temperature	-50 °C to +45 °C
Design altitude	max. 1000 m
Frequency	15 - 62 Hz

More detailed information on the TOV capability and the protective characteristics are given in Publ. 1HSM 9543 13-01en.

1) The continuous operating voltages U_c (as per IEC) and MCOV (as per ANSI) differ only due to deviations in type test procedures. U_c has to be considered only when the actual system voltage is higher than the tabulated. Any arrester with U_c higher than or equal to the actual system voltage divided by $\sqrt{3}$ can be selected.

2) With prior duty equal to the maximum single-impulse energy stress (2.5 kJ/kV (U_p)).

3) Arresters for system voltages 36 kV or below can be supplied, on request, when the order also includes arresters for higher system voltages.

Arresters with lower or higher rated voltages may be available on request for special applications.

Each crate contains a certain number of arrester units and accessories for assembly and erection. A packing list is attached externally on each crate.

Each separate crate is numbered and the numbers of all crates and their contents are listed in the shipping specifica-

tion. ABB reserves the right to pack arresters in the most effective/economic combination. Alternate or non-standard crates may involve additional charges.

The table above is to be seen as an approximation and specific data for deliveries may differ from the values given.
