

US304

S4 Paint FlexUI Operations (In Plant Only)

The course goal is to teach students how to use FlexUI at the Operators Console.

Topics include

- Safety precautions used while operating a robot system
- General overview of the FlexUI screens
- Demonstrate and explain the purpose of each screen

Course objectives

After successfully completing the course, the participant should be able to:

- Practice safety as it pertains to the robot system and external controls
- Introduction of FlexUI as interface software for the operator's console
- Overview of the screens
- How to operate the ABB paint system from FlexUI
- Practice error and fault recovery
- How to make setup changes for the ABB paint system from FlexUI

Student profile

- This course is intended for people that are familiar with Windows
- Engineers, service personnel, and system integrators

Prerequisites

- Prior knowledge of Windows can be helpful
- Understanding robot system functionality

Course duration

The course duration is 3 days.
