

# Case Study; Cookers

“We asked for an output of nine parts per minute, but the tandem press line is giving us better than 11 parts per minute. It has delivered everything we hoped to get out of it” *Colin Thomas manufacturing engineering manager Electrolux*

## Client

- Electrolux, Australia

## Application

- Press tending
- De-stacking

*System installed by Manzoni and ABB Australia*

## Key Drivers & Benefits

- ✓ Operational efficiency around 90 percent
- ✓ Flexibility allowing for a wide range of parts
- ✓ Doubled parts output – more than 11 parts a minute
