

Case Study: Mining machine caps

“The quality of the welds made by a robot is much higher, which for a mining machine that works in dangerous environments is an important safety improvement.”

Olle Persson
Allt I Plåt

Client

Allt I Plåt, Sweden

Installed by Andon Automation, Sweden

Application

Arc welding

Key Drivers & Benefits

- ✓ Welding time per cab has decreased to around three hours, compared with a whole shift of done manually
- ✓ Increases capacity and production
