

Case Study: Chassis and automobile parts

“The robot effectively does the work of three welders using just one workstation.”

Milan Skorpa, Project manager
STROS

Client

STROS; Czech Republic

Application

Arc welding

Material handling

Key Drivers & Benefits

- ✓ Consistent high-quality welds
- ✓ The system can be easily reprogrammed to produce other parts
- ✓ One tailor-made robotized workstation produces the same number of pieces per eight-hour shift as three human welders would
